

FSMA Training

Our FSMA Training program has been designed for carriers, brokers, and shippers. The content is divided into role-specific modules (ie. Drivers, Brokers, Operations) and is available in both English & Spanish. Our eClassroom provides an easy to use and access platform for all levels of users.

Iron Apple eClassroom

-  Web-Based, eLearning Mobile Friendly Platform
-  Dashboard Reporting for Team Leaders
-  Easy User Management & Progress Tracking
-  Digital Training Certificates (PDF), Share & Print
-  Simple to Use & Navigate for all Users

About Iron Apple

Iron Apple specializes in food safety applications for food transporters and cold storage facilities to easily meet compliance through the use of records and technology. Our solutions can be used in a stand-alone environment or can be fully integrated through our Open API data structure allowing for other software to easily adapt to provide you a streamlined solution with minimal interruptions to your business. This software is ideal for any carrier, owner operator, broker, shipper, or storage facility that transports / stores perishable and non- perishable food products.

FSMA COMPLIANCE

Meets & exceeds FSMA Sanitary Transport Rule training requirements. Provides additional content covering Good Transportation Practices when handling food.

EASY TO USE & ACCESS

Web-based digital platform, mobile friendly and easy to use. Simple design and layout that provides access to training materials & digital training records for sharing & printing.

ALL PEOPLE HANDLING FOOD

Content is suited for all individuals involved with transporting / storing food or food ingredients. Content is available in English & Spanish.
